

## **MINDFOLDED (Gimmicks and Online Instructions) by Julian Pronk**

**Mindfolded** is the very first blindfold gimmick ever released on the market. The blindfold is designed with exact precision so that the gimmick disappears exactly and cannot be seen.

You can use **Mindfolded** for many different things, for example you could have spectators perform assignments through the blindfold. You can make the spectators think things you want.

You can also put it on yourself and know exactly what color shirt the entire last row of the audience in the theater is wearing.

Or you can know exactly what someone writes down.

So many things are possible with **Mindfolded**.
