

## Devil Box - Teak Holz - Crystal Cleaver Zaubertrick

Show a square box having a sliding door in front with two slotted holes in either side near the middle, a metal rod, a stand along with a small block which has hole running through its center.

Open the door of the box and place the block in the bottom of the box and close the door. Now insert the rod through the slot, and immediately remove the door to show that the block has magically floated upwards and impaled itself in the rod.

- This is a beautiful item made of Teak wood.
