

Collapsible Wine Glass by Joshua Jay - Weinglas einfach zu Transportieren - Bruchsicher Zweiteilig

Joshua Jay and Vanishing Inc. present the perfect solution for transforming your close-up card magic into a larger parlor piece.

Card magic can actually work very well in larger settings as long as you're able to make the cards vertical (and ultimately more visible). A wine glass is one of the most sophisticated ways to do this. But hoping a venue has the right glass is a risky bet and wine glasses are simply too fragile to travel with consistently. Josh knows from experience, which is why he took matters into his own hands to create the ideal solution for magicians.

While the idea of a portable wine glass has existed before, the "**Collapsible Wine Glass**" by Joshua Jay and Vanishing Inc. was built specifically with card magic in mind. Unlike the common rounded-bottom glasses, this elegant, vintage-inspired wine glass has a squared-off bowl that is perfectly suited to hold playing cards. This specific size can easily house an entire deck of cards.

The two-part glass disassembles in seconds for easy, compact, and safe travel. As a special bonus feature, the stem screws directly into the bowl allowing you to transform the glass into extra storage for any smaller props.

Crafted from super durable plexiglass, you won't have to worry about your "**Collapsible Wine Glass**" getting knocked off a table or breaking in transport either. It is built to withstand the rigorous schedules of even the busiest performers.

Use "**Collapsible Wine Glass**" to elevate your card magic routines or for any of your other favorite close-up or stage routines. It's an invaluable accessory for any magician.

You receive the glass and a foam carrying case.
