

Instructions for Miracles by Friedrich Roitzsch - Buch

Instructions for Miracles features 10 beautifully constructed performance pieces for advanced card workers straight from the repertoire of Friedrich Roitzsch. While the plots may sound familiar to you each piece has been updated with some new ideas. The book is hardbound with an extravagant, relief-varnished cover designed by Jörg Willich. It contains 98 pages, 87 crystal clear illustrations by the author and a foreword by Pit Hartling. It's written in English and measures 5.8 x 8.3 inches.

Friedrich Roitzsch has been astounding his audiences for over 20 years, and that not only by the unorthodox spelling of his name... As a professional specialized in close up and card magic he has a clear understanding of what makes an effect commercial. At the same time he is still enthusiast enough to put in the extra time and effort to make his tricks stand out from the crowd. With his impressive skill, intelligent presentation and contagious smile he is a well booked performer for business events and private parties.

Foreword by Pit Hartling

Introduction

Switch'em

After demonstrating an impressive hand muck the magician outs an innocent spectator as professional card cheat and coaxes him into performing an even more incredible card switch!

Luminous Readers

When seen through the lenses of a special pair of glasses the backs of the four aces appear in a different color. Or that's at least what one spectator thinks is happening...

Robin Hood

The magician throws a card up to twelve feet high into the air, catches it in the deck and shows that it actually split a chosen card! And yes, the card is actually

signed...

Fastest Card Trick in the World

The magician performs a lightning fast transposition of the four signed Aces and Kings. Then he repeats it but with the Kings going into four different pockets!

Power Matcha

The spectator succeeds several times in finding the mate to a chosen card while all the other cards are shown to be hopelessly mixed. Then suddenly the whole deck is arranged in pairs!

Nine Card Monte Revisited

A very clean version of José Carroll's famous plot using trick cards. Nevertheless in the end all cards can be examined!

Far Out

The magician divines three freely chosen cards without ever coming near the deck at all!

Out of this Card Box

A version of Paul Curry's ingenious OOTW. Thanks to an "out-of-the-box" concept it starts with a thoroughly shuffled deck!

Magic Squared

Four chosen cards from a special number deck add up to a freely selected number. This is repeated until a full magic square is on the table

Instructions for a Miracle

Probably the most practical and direct version of José Carroll's fantastic plot where a signed card appears bound into a small booklet!

Disclaimer: Instructions for a Miracle is based on Juan Manuel Marcos' El Milagro, which is a marketed trick. It is presupposed that you're already familiar with it to fully understand this version of it.

QUOTES:

"I've seen Friedrich perfect these routines over years. They are strong and clean, and effects the audience will talk about."

- Denis Behr

"One of Friedrich's talents is to identify strong, solid effects and then to put in the important work to streamline, combine, enhance and create the best version and handling. All ten effects in this book are amazing, elegant and beautiful pieces of magic."

- Pit Hartling

"I have witnessed Friedrich several times performing effects from this book in front of real audiences and the perfection of his effects was always breathtaking. Even the smallest details were honed over the years and the result you'll find in this book full of miracles."

- Wolfgang Moser

"I've had the pleasure of knowing Friedrich for over 30 years, witnessing some of these ideas, moves and routines take shape and others fooling the heck out of me. He's one of the best sleight of hand artists I know. So do yourself a favour and follow Friedrich's instructions, you will be rewarded with miracles!"

- Thomas Fraps
