
Fultons Chinatown Bootleg Standard Edition - Pokerdeck

Many years ago I received an email asking if a deck of my cards were authentic. Turns out they were bootlegged copies found at a night market in Asia. It made me think what the act of copying a deck would look like--so I bootlegged my own using an old Xerox machine.

These **Chinatown Cards** have never looked so good - a complete replica of the original classic made as a facsimile.

Tuck box is a photocopy printed on matte paper and is striking.

Only **500** of these decks exist and are the best rendition of this deck official or otherwise.

Printed in China on cardistry stock.
