
SB Watch Pocket Edition (King's Cross) by András Bárházi and Electricks

SB Watch is a product of András Barthazi. It is an elegant-looking hybrid Bluetooth watch, which looks like a "normal" analog pocket watch. We have designed it to look simple and natural. It is the innocence of the watch which makes it ideal for use with the **TimeSmith** app (included for free).

It has a button that looks like a crown. It is turntable with no effect. The advantage of the turntable crown is that you can imitate pulling the crown own, then ask the spectator to turn it, and she will think she is setting a time. Meanwhile, you can force a preset time, and use your prediction. Perfect for your one-ahead routine.

The pocket watch models:

- King's Cross: our original pocket watch design, with a brass-colored case, Roman numbers (I - XII), King's Cross, and London texts on the yellowish face
- Anchor: similar style to our original design, with a brass-colored case, Roman numbers (I - XII), and a big anchor on the yellowish face
- Silver: a simple design, with a silver-plated shiny case, and Arabic numbers (1 - 12) on a white face
- Black: a simple design, with a black-plated shiny case, and Arabic numbers (1 - 12) on a white face

The **SB Watch** uses NO confederate or pre-show. You can perform it anywhere, anytime without any issue.

The TimeSmith App

The **TimeSmith** app is developed by Benke Smith, available for Android and iOS. The app was developed to control the **SB Watch**, mainly by setting the hour and minute hands to show a custom time. The time can be freely selected by the spectator, but it also can be a pre-configured (force) timestamp. The number of magic routines and customizable options will grow in time, with the help of the dedicated Facebook community, however, the app already has 12(!) ways to set the time:

- Lock Screen: type in the time while unlocking your phone - even if the spectator sees what you are doing, they won't discover the secret.
- Swipe: swipe on your phone or use your Apple Watch.
- Doodle: let your spectator write down the time into an innocent-looking doodle app, or use a compatible board, and they set the watch for you.
- Spotted Dice: do you have our Spotted Dice? Let your audience member roll the dice and SB Watch is set - you have to do nothing.
- Rubik's Cube: are you a CubeSmith user? Just do 4 simple moves and SB Watch is set even before you start your favorite CubeSmith routine.
- Photo: let your spectator write down the time and just by holding the paper over your phone SB Watch knows what to do. Want to give them a photo as a gift? Take a photo of your spectator holding the paper and the moment the photo is taken SB Watch is set and you have to do nothing.
- Remote Control: using a compatible remote control (Wilson Nexus, Thought Cast Versa) you can set the time (even without using the app). Sold separately.

-
- Voice Recognition: if you would like to perform the lazy way, we got you covered. You can set the SB Watch just by talking to your audience and the watch is set. Set up words and associate times for them - you have to say no numbers to set the time. Best working in a silent environment, like a Zoom show.
 - Calculator method (Android only): perform another routine that includes the time as a 4-digit number, and SB does the rest of the work for you.
 - Web Input: use a website made only for the SB Watch and input the time there. Perfect for a stage or any kind of environment where you have a secret assistant.
 - Bluetooth Keyboard: with a Bluetooth keyboard just input the time with ease.
 - NFC/RFID: do you have our NFC/RFID cards (blank is recommended)? If your phone can read the cards, then just write times on them and set up the app, and when you hold the card near your phone, it will set the time.

Now, be honest with yourself. Isn't the **SB watch** the best prediction watch you saw? And we have still left some ideas to add more input methods.

SB Watch Has a Bright Future

The SB Watch and the TimeSmith apps are updated regularly with new features that you get for free.

Replaceable Battery

The SB Watch has a replaceable CR2032 button battery, which will power the watch for more than a year if it's used as a regular watch. Using magic (moving the hands frequently) drains the battery more, but we still estimate several months of battery life.
