
Vectra Strong Invisible Thread by Steve Fearson - Unsichtbarer Faden

Steve Fearson's **Vectra Line** is the strongest invisible thread ever offered to the magic community.

A single strand can hold nearly a quarter pound! That's a full deck of playing cards!

Now, for the first time you can safely levitate large items like CDs, coat hangers, scissors, you name it. Vectra Line is as invisible as some of the thinnest threads on the market but is stronger than all of them.

Q. Is Vectra Line stronger than Kevlar or Spectra thread?

A. Yes, substantially stronger.

Q. Can I refill my existing reel with Vectra Line?

A. Yes, you can refill any thread reel with Vectra Line.

Q. Are there any drawbacks to using Vectra Line?

A. Vectra Line can be difficult to cut with scissors. They need to be very sharp; alternatively, you can use a razor blade.

Q. Can Vectra break?

A. Every invisible thread has a breaking point, so while it is substantially stronger than most it can break

With each packet of Vectra, we are now including a link to 35 minutes of instructions that were previously sold separately! This online course will show you exactly what makes Vectra Line so special. Here are just a few of the things you'll see:

- The amazing FULL DECK LEVITATION, the demonstration that helped popularize the Vectra Line is explained in depth.
- Steve also details his incredible FLOATING APPLE routine where an apple appears to float up to your mouth and you take a bite out of it!
- Cause an ordinary fork to suddenly JUMP out of an ordinary wine glass. And there's nothing attached to either one!
- The rarely seen ANTI-GRAVITY HAMSTER illusion! If you've ever seen a

hamster levitate then you know that this trick alone is worth the price of the video.

More than 35 MINUTES OF AMAZING MAGIC! YES, THERE ARE A LOAD OF IDEAS in this download!

- The Stripping Secret
- The Full Deck Demo
- The Floating Apple
- Floating Soda
- Alternate Hookup
- Floating Robot
- Flying Bug
- Spinning Floating Top
- Floating Quarter
- The Mousetrap
- Moving Bottle
- Spirit Fork
- Electronic Floating Cigarette

In addition, you'll learn Steve's thread stripping secret; never struggle with invisible thread again! Lighting theory for thread work is also discussed in depth. Finally, Steve shares his advice on how you can make any levitation you perform look as REAL as possible! This info is INVALUABLE to anyone serious about thread work and this alone is worth many times the price of this package.

Fearson's **Vectra Line** is the result of several years of research and development. Ultra high-tech fibers are used primarily by the military and space programs and are generally unavailable to the public at large. We are proud to bring you this exciting product, at an affordable price.

The **Vectra Line** contains over 100 individual invisible thread fibers. You receive 10 feet of unstripped thread, which equals well over 1000 feet of super strong invisible thread!

"When it comes to strong invisible thread there's always been a juggle between strength and invisibility. As a rule, the stronger it is the more visible the thread becomes. Steve Fearson's Vectra line defies that rule by being just as invisible as any of the more commonly used invisible threads. Yet it's so much stronger. Not only is it allowing me to be more confident that it won't break during a

performance, but it's also allowing me to do a wider range of effects with heavier objects."

- Expert thread worker Ron Jaxon

"The Vectra Line thread is the thread of the FUTURE, stronger (much stronger), finer and much more invisible than Kevlar. In fact, I've never used Kevlar simply because I felt that it is not as invisible as the traditional threads, but the Vectra Line has finally solved this problem and I am going to start using the Vectra Line, replacing my thread work with it. This is powerful when combined with the Master Levitation System!! Now it's time for some real close-up miracles! Well done Steve for keeping one step ahead of all others when it comes to levitations."

- International Illusionist Brian Role

You are also supplied with a small sample of Steve Fearson's Master Wax (colors vary) so you can start testing right after you receive the thread.
