- Easy to hide, no palm required
- Facebook community with 2000+ members

Introducing our Electronic Peek Device

PeekSmith 3 is a miniature state-of-the-art electronic peek device like no other in the magic market. Proudly used for mentalism shows by professionals worldwide such as Colin McLeod, Jan Forster, Jonathan Levit, Shawn Farquhar, Ryan Tricks just to name a few.

Designed by magicians for fellow performers, the **PeekSmith 3** is the flagship device of our product line. It enables covert access to information from a variety of sources, including other devices and apps. Equipped with a high-resolution color screen, vibration motor, and intuitive input buttons, this device is a must-have for any serious magician.

Product Benefits

Our peek device grants you discreet access to an array of information, including card details, words, pin codes, drawings, and much more. The device's covert capabilities allow you to acquire the secret information you need without raising suspicion, making it the ultimate tool for mentalism.

Our peeking device allows you to receive information about cards, words, pin codes, drawings, and anything you can imagine. You will get a peek at all of the secret information you need, without anyone noticing how you did it.

It will elevate your performances and take your routines to the next level by seamlessly integrating with popular magic apps, including but not limited to:

-
- Inject 2 by Greg Rostami
 - Wikitest by Marc Kerstein
 - Pi Revelations by David Penn
 - Cognito by Lloyd Barnes
 - New Cypher Pro
 - Picasso Pro by Ellusionist
 - Hydra by Ellusionist
 - Novus by Ellusionist
 - DiceSmith by Benke Smith
 - TimeSmith by Benke Smith
 - CubeSmith by Benke Smith

Also, it can directly connect to other devices such as:

- Spotted Dice by András Bárházi
- Kinetic Mental Dice by Marc-Antoine
- Insight by Hugo Shelley

PeekSmith App

The PeekSmith app is a free companion app for PeekSmith devices (some extra features might need payment). Among its expanding list of capabilities are:

- a thumper for sending text messages, vibration patterns or card information by an assistant
- an in-app doodle board with text recognition; you can draw on the screen, or you can use a Labco Mindbuster or Bamboo Slate
- a Web Thumper, so your assistant can send you messages from the other side of the world
- other configurable web polling sources to integrate your own sources

Standalone Mode

With its standalone mode, it allows for independent operation without the need for a phone. Utilizing Bluetooth connectivity, it can seamlessly connect to other devices such as the Spotted Dice to display roll results, an NFC/RFID reader for card reading, or drawing boards for real-time display of sketches.

With a dedicated focus on continuous improvement, the firmware is actively

under development, adding new features and capabilities with regular firmware updates that can be easily installed.

Hiding Tips

It is palmable and also fits in a card box or in the several amazing accessories our partners or we are offering. Having it in your pocket you can peek at it blindfolded or feel the signals from compatible apps and devices.

Continuous Improvements

We understand the importance of staying ahead of the game in the magic industry. Our commitment to excellence drives us to collaborate with leading magicians and creators to expand compatibility with a wide range of applications and devices, as well as regularly enhance the firmware and companion app.

Advantages

PeekSmith is designed by magicians, for magicians. It stays on permanently so you can get your peek at a glance whenever you need it. Apple Watch and smart band screens turn off after a short while to save battery. PeekSmith is compatible with many apps that have no Apple Watch or other smart device support.

Dimensions of PeekSmith makes it easy to hide it in places where you cannot hide an Apple Watch (like card boxes, or your pocket). The screen is optimized for readability, and we are working with fellow app developers to maximize the information you can peek from the screen.

While other devices on the market can display information for you, our device is the best in its category, offering the most integrations and constantly growing features for an amazing price.

QUOTES:

"As a CubeSmith, TimeSmith, PeekSmith and soon DiceSmith user with their appropriate products, I have to say I have never been so impressed by the sheer amount of app updates / features, routine versatility and customer service by any other magic duo. Some of my best purchases ever!"

- Angelo Carbone

"This little device is incredibly good and extremely so reliable! Actually, it is that good that I use it now permanently in my shows and even bought a second unit as back up! And the accompanying app is really great. Highly recommended!"

- Jan Forster
