
Mind's Eye by Joel Dickinson - Buch

"Joel Dickinson is an amazing talent, his magic and mentalism creations are all simple, powerful, but most of all they are practical too!"

- Michael Murray.

After selling out REPEATEDLY, **Mind's Eye** is finally available as a physical booklet but this time, world wide! Three SOLID mentalism routines and two bonus techniques!

Each effect gives the impression that you can tell people things they are merely thinking of, when you have only just met. Fine tuned over hundreds of performances.

CALIBRATE MAXED: Calibrate Maxed is just one of the incredibly powerful routines. Imagine a participant drawing a picture of potentially anything they desire and concealing it. Then, you astound them by revealing the exact image they've drawn and conclude by disclosing their star sign, and the best part is, they don't have to say a word! Your participant will be just as amazed as the spectators. Calibrate Maxed is remarkably easy to perform; there's no intricate process to follow, and the star sign reveal will leave your participant astounded.

INVISIBLE DICE: Introduce a die to your participant. They roll it and lock their freely chosen number in their mind (no force). You then reveal the number your participant rolled and even discern a specific thing they are thinking of. Sorry, I should have explained something; it's the best part... the die they rolled doesn't actually exist. It all happened in their mind. The die is rolled in your participant's mind, and you know the number. No mathematics, no one ahead, and no convoluted procedures - actually, no procedures at all. It is a fun routine that you will genuinely enjoy performing.

DIRECT ANSWER: A participant answers his own question by creating an unknown prediction. The prediction proves to be much more than first realized. This is a unique and practical routine and it is not to be missed.

BONUS MATERIAL: MINDset - A unique system to force an object from a stack of business cards. It is practical and everything is above board, however, not all is as it seems.

Mind's Eye Peek Joel's go to peek. Very practical, impromptu and no peek device required. You can perform this on the fly. It's a simple peek and it is very deceptive.
