
Bigger by Nikolas Mavresis

Bigger is a perfect EDC with one of the most common everyday objects - a lighter.

You point out the small BIC logo on the lighter and ask your audience if they can read it. You mention it would be easier to read if the logo were big. Instantly the logo amazingly becomes BIG, taking up the entire length of the lighter! You say let's go even bigger, and in the blink of an eye the lighter doubles in size and the logo also transforms a second time from 'BIG' to 'BIGGER'! The lighter can immediately be handed out for examination!

Bigger is stunning organic magic that's quick, insanely visual and easy to do, all achieved with minimal, very easy sleight of hand, taught by Chris James.

You will receive 2 sets of custom printed stickers (plus an extra something), so just supply your own lighters and you'll be ready to go!
