
BUBBLE RING by Adrian Vega

Adrian Vega brings to you a surprising, poetical, original and very visual reputation maker piece, using one of the most magical toys, a bottle bubble blower.

When he imagined this almost when he was a kid, it was just a impossible idea in his mind, he only imagined the effect, but the method seemed to be impossible to find. Something too good, too magical to be possible.

After years of trying, restarting from scratch, and trying again, he finally developed a very nice and easy method to achieve this dream effect.

Imagine borrowing a spectator's ring to make it travel inside of a bubble (sounds impossible already!), until you gently "splash" the bubble, Making the ring appears again, but... LINKED to the bubble wand.
