Unlock the deepest secrets of the human mind with the **Sharp Prediction** - the definitive kit for the modern mentalist. Tailored for both newcomers and seasoned professionals, this comprehensive set will revolutionize the way you interpret and manipulate cognitive processes.

### **Main effect:**

Channel the essence of true mind-reading as you flawlessly reproduce drawings made by your subjects, without ever catching a direct glimpse of their work. With our meticulously crafted peak method (by Phill Smith), you'll astound audiences with your unparalleled ability to mirror their thoughts onto paper.

...**but that's not all.** Prepare for gasps of disbelief when, as a mind-blowing climax, you reveal that the very object they've drawn is also inscribed on the barcode of the pen - a pen that the spectator has held in their hands the entire time. This unexpected twist adds layers of astonishment, leaving audiences both baffled and amazed.

### **But there's even more:**

In addition to the drawing duplication, this kit contains at least 7 other routines, including a routine with ESP symbols, names/persons, cards, and a magic square. Beyond the 8 included routines, you can create a vast number of your own routines around them.
