
Forest elf Badger - Pokerdeck

The inspiration for the **Forest Elf design** comes from the collage painting form that began to circulate in the 19th century. By using color painting, multiple sprites, and plants are cleverly integrated to create a brand-new image.

Standard Edition

Each tuck case corresponds to the lifestyle habits of various "elves", with graceful streams, dense forests, and fragrant fruits. On the basis of the relief design, watercolor, and gilded text are also added to embellish it.

The overall color is mainly gradient gold, paired with a cute elf image, symbolizing a bountiful harvest of fruits and a pure soul. The leaves and fruits seem like a part of the animal itself, leaving a hiding place for the elves, and also leaving infinite space for imagination in this deck of cards.

Standard badgers, squirrels, and owls are limited to 999 pairs each, with custom seal.
