
Wonderful Routines of Magic 2nd ADDENDUM by Ellison Poland - Buch

Wonderful Routines Of Magic-Second Addendum by Ellison Poland

A wide assortment of magic from various well-known contributors. Includes effects with playing cards, coins, and mental magic.

The book is hardbound with a colorful dust jacket, it measures 6' by 9" and contains 200 pages. This second addendum to the original Wonderful Routines of Magic contains fifty-seven items, only twenty of which are by the author. The other contributors are; Aaron Black, Tony Econ, Peter Duffie, SteveHook, gene Maze, Harry Milliken, Charles Pecor, Steve Pressley, Dan Tong, and Gary Ward. The primary focus is on close-up magic. The Second Addendum is indexed.

The effects are mostly cards and coins. There are two out-and-out mental effects and two or three of the card effects can be presented as very strong mental effects.

When "**Psychic Pulse**" was shown and explained to several magicians while on the way home from a magic convention, they said that it alone was worth the price of the book.

It is firmly believed that applications of "*Slough-off Control*," combined with "*Slough-off Mathematics*" can revolutionize one facet of card magic. If these two concepts are combined with John Quine's handling of his "*Quine's Keeper*," even more miracles are possible.

- Printed in 1994, the Second Addendum is 191 pages! These copies are first editions!
- Well illustrated and includes 58 items!
- Primary focused on close-up magic!
