## **Bendix Bombshell Wallet by Tejinaya**

With this advanced Himber Wallet, you can show the card-to-wallet effect repeatedly. Invented by Dave Bendix, this wallet has not been readily available for a long time. Since the mechanism is a little complicated, the materials and technology to make it are difficult to source. So, at Tejinaya, after a lot of trial and error, we are finally able to produce a high-quality **Bendix Bombshell** at a reasonable price.

It is accompanied by Ryusei Kamiguchi's instructions and commentary (basic card techniques are required).

Included:

- Bendix Bombshell wallet (synthetic leather)
- Online instructions
