
The Chinese Teapot by TCC Magic

Introducing the brand-new Chinese Magic Teapot - A blend of tradition and new innovative surprises.

Throughout history, the teapot or kettle has been used in various magic effects, like pouring water endlessly and pouring different colored liquids and beverages. The Chinese Magic Teapot boasts a full-stage act packed into a compact form.

This limited-edition masterpiece stands as a testament to both its rarity and exquisite craftsmanship. The teapot is shiny polished stainless steel. Its minimalist design hides its enchanting capabilities.

Effect:

After the teapot is shown to be empty, the magician shakes it gently, and water flows out multiple times, which defies nature.

But there's more - remove the lid on the tea kettle and colorful scarves are produced from inside the teapot, like a beautiful rainbow. Although the scarves come from inside the teapot that had liquid a moment ago, miraculously, the scarves are totally dry.

From these scarves, the magician magically produces a real shot glass that is filled with liquid!

And just when the audience thinks the magic is over, the teapot surprises everyone by suddenly being filled and overflowing with rice. A fantastic finale ending that nobody expects.

Meticulously constructed from stainless steel, the magic teapot ensures both longevity and grace. The elongated gooseneck spout design not only exudes elegance but also guarantees spill-free pouring, elevating the finesse of every performance. The teapot is designed to be easy to use so that you can focus on your best performance.

Features:

- Looks like a regular gooseneck kettle

-
- Polished stainless-steel finish
 - The water poured from the teapot can be shared with the audience
 - Multiple magic moments with a surprising finale.
 - Safe and easy to use
 - Uniquely handcrafted, made exclusively for TCC Magic, and only available here.
