
Morgan Replica Magnetic Scotch and Soda

The magician slowly displayed two coins, one silver and one copper, which were clearly placed in the audience's hand. The audience clenched the hand into a fist and reopened it. The copper coins magically disappeared from the audience's hand and appeared in the magician's pocket.

This is the classic coin magic prop, the **Magnetic Scotch & Soda**.

N2G has dedicated his own version - S&S - with his top-notch coin craftsmanship as always.

S&S adopts Morgan & Copper coins for production, which are suitable for manipulating magic techniques and are of appropriate size, making them eye-catching in various performances.

S&S adopts a magnetic locking system. With exquisite craftsmanship, magic can safely occur in the hands of the audience. And it allows the audience to check the coins in their hands.

S&S is not only a complete set of coin props, but also a heartfelt handicraft. Don't miss it.
