
EXTREME MONEY EURO by Kenneth Costa and André Previato

Imagine being able to turn a bill of money into another and then again into another! It seems impossible but that's exactly what will happen right in front of everyone's eyes.

You just make a slight movement with your hand and the transformation happens. Very visual, clean and no suspicious movements, simply switching from a low denomination bill to a large denomination bill.

As if that weren't enough, one more breath with the same movement to obtain a second instant change and this time with an even greater value.

ALL VISUAL, WITHOUT COVERAGE.

And the best BOTH SIDES of the note are shown, along with YOUR EMPTY HANDS.

Few gimmicks allow for quick and very easy display like **EXTREME MONEY**.
