## The Four Seasons Classic Boxset - Pokerdeck

As one of the most traditional folk arts in China, the art of paper cut can be seen from festivals to days of blessing. It's not only one of the folkways to express miss and emotion, but also our common memories. To distinguish from other playing cards that depict seasons and scenery, we employ paper cut as the core style of **Four Seasons** and closely focus on paper cut in graphic design, craft, and creativity.

The combination of splendid paper carving and gold foil is also applied to the box. Red, a symbol of joy and the New Year in East Asia is used as the main color of the collector's box, which is covered with gold foil and engraving.

Before you get the cards, you can feel the extremely high achievement of the **Four Seasons** series in paper carving through the engraving on the box.

The paper carving on the collector's box is divided into two layers. The first layer is a pattern inspired by paper cut, also drawing on the presentation of paper cut art. A complete paper that presents the design and background by carving. Through the gaps in the pattern of the first layer, you can see the holographic gold foil hidden in the second layer.
