"I've always been a fan of Joel's thinking; he creates clear and direct mentalism with smart and very easy to apply methodology. The beauty with Nostradamus is that this versatile method for predicting information takes up almost no pocket space, there are no unnatural moves, and the fact that the prediction stays in full view throughout is nothing short of excellent. This is a method that you WILL use, and as it comes ready to go out of the box, I'm confident that you'll be able to show your friends the very same day it arrives."
