
Mirage Grating Collector's Box Set - Pokerdeck

This reward uses grating art to subvert the traditional presentation of paper cards as printed materials.

The exclusive collector's box includes a collection certificate and two decks of playing cards, which are not sold separately. The grating film used in the tuck case creates a mesmerizing effect, displaying two different images depending on the viewing angle.

One deck features a black border inspired by the frames in art exhibitions, giving the feeling of an experience and drawing focus to the stunning illustrations.

The other deck breaks the performance limit of the original size of a playing card by combining four cards to showcase Lee. K's illustration is in stunning detail, making every element clearly visible.
