
The Morning Sun - Pokerdeck

The inspiration for this deck of cards comes from the dawn's radiant glow.

The card back design is based on the letter 'X' and expanded from there. Overall, it uses colors like pink and light blue.

To more closely integrate the deck with the story of Picasso drawing a circle, there are several special cards in this dawn-themed set.

First, there are two Jokers depicting the circle from Picasso's story.

You can tell the audience about Picasso's tale while drawing a circle on the card.

On another Joker, there's a print of the '8 of Diamonds', allowing you to integrate the story with a card chosen by the audience.

Lastly, using two other special cards, you can piece together Picasso's artwork titled "The Dream".
