
EVOS Green - Pokerdeck

In the design of the card back, Chasing Light V1 employs a spiral hexagon combination, using three shades of teal to create a sense of depth.

The black portion of the cards has a rich texture, utilizing a three-layer black core paper. The fiber of the paper, the stiffness and flexibility of the cards, and the whiteness of the paper's surface all contribute to enhancing the user experience during live performances and video shoots, simultaneously allowing for the pattern, suits, and numbers to be even more distinct.
