Apple Pi by Kings Wild Project - Pokerdeck

Continuing a beloved, light-hearted playing card series, **Apple Pi** is a deck of traditional playing cards designed by Jackson Robinson.

The Pi Series of playing cards was started over two years ago with the original Pi deck, which was the first deck in the Kings Wild Playing Card Subscription. We followed it up with Plum Pi and Chocolate Pi with great success. **Apple Pi** is the next deck in the Pi series and will surely appease your Pi-eating appetite.

The **Apple Pi** deck printed by the Kings Wild Playing Card Company. It is printed on black core cardistry stock with an embossed finish for exceptional handling.

Both the standard and gilded editions feature custom tuck with embossing, foiling and a matte laminate finish.
