## **Strolling Smiley by Dr. Michael Rubinstein**

This is one of the rare, seemingly impromptu routines that puts a smile on people's faces.

You begin by borrowing a Quarter from someone and drawing a sad face on it while explaining that coins can sometimes reflect the emotions of their owners.

To make the coin feel better by rubbing it, it begins smiling when the sad face changes into a happy one! Another wave, and the coin changes to a very happy grinning face as you hand it back to the person you borrowed it from as a souvenir.

The tutorial includes Michael's original routine, his new streamlined handling, and Meir's simple handling.

Comes with a gaffed US Quarter and access to an online video tutorial by Dr. Michael Rubinstein and Meir Yedid. A Meir Yedid Magic product.
