
PHANTOM TUBE by Sorcier Magic

A plexiglass tube is shown and sealed with two rigid plastic caps. Now the clear tube is placed inside a paper tube shown empty. The magician places the tube in the hands of a spectator or places it on his table. Now you show a silk with a side of about 30cm which is made to disappear. The magic will happen when you lift the paper tube and you will see that the transparent tube now contains the scarf that has disappeared!

Made with care, supplied with the tube (36cm long) to achieve the effect, two caps, a red gimmicked silk.

Easy to do, does not require difficult manipulations.

No extra red silk (regular 12 inches) is included.

Video instructions attached.
