
The School of Cardistry V6 Deck

8 years ago in May, the School of Cardistry YouTube channel was born.

Since then, we've grown to over 130,000 subscribers and received the YouTube silver play button! We're proud to have been an introduction to the fantastic world of cardistry for many new cardists, and will continue to work hard to be one of the best resources for cardistry.

The School of Cardistry V6 deck features a sharp, modern design by ITS Team from South Korea. The cards are printed on a medium-stiffness stock, triple varnished finish, with a new edge cutting blade. This is the best deck we've ever made, if we do say so ourselves.

Only 1,000 decks were printed.
