## Snowflake SG by Bond Lee and ZF Magic

*"Snowflake is well engineered, beautifully fabricated and very practical."*

- **Kevin James**

This is the second generation of our snowstorm teapot, and it has many advanced details.

**Effect:** The magician displays a piece of paper, tears it up and soaks it in water. Then he magically transforms the paper wad into beautiful snow confetti, creating a magical snowstorm.

We upgraded our blower allowing a stronger wind power.

Now we have two modes of control: timer and infrared, so you can customize your presentation.

- Elegant complete routine
- Strong blowing power (confetti height 4 - 10 meters)
- Two control modes: timer & infrared
- Advanced details
- Easy to use & carry
- Reliable and effective
