## Chop Cup Classic 2.0 by Ickle Pickle

A beautiful spun aluminum cup is shown and a red (or white) ball is rolled out. The cup is placed upside down on the table and the ball is placed in your pocket. When the cup is lifted, the ball is underneath. This is repeated with the same result and can be used to create some phenomenal routines! Click on the video below!

### INCLUDES MODERN CHOP CUP BALLS

**2.0:** Since the time of our new ownership, the retirement of our 40-year metal maker, and the addition of our new guy Ickle Pickle's metal department has had some "high-end" changes. The material is a higher gauge resulting in greater strength and more consistent wall thickness throughout each item. We have access to tooling we never had before for a better production process especially for items that require the assembly of multiple parts. Sure, there's cheaper stuff out there but what do you want to walk on stage with and how many times do you want to replace it throughout your life? Why not start with the best?
