
Pi MAX Book Test by Vincent Hedan - Buch

Pi Max is the brand new version of my impossible memory effect created in 2010. You show a pocket-sized book in which the decimals of Pi are listed, and you explain that you have memorized them. The spectator opens the book to any page, announces the page number, and you remember the first digits of the page!

You then ask him to give you a sequence of 5 digits, anywhere on any page. From this place, you begin to recite the decimals of Pi! You recite so many decimals that the spectator has to turn the page to follow you!

Finally, you ask for the spectator's birthday, for example July 14th. You then reveal the page, line and position on the line where the sequence 0714 is located in the book!

- No crib
- No app
- No peek
- No pre show
- No electronics
- No accomplice
- No complicated math (This is the stackless version of Pi Max.)

Why is it called "**Pi Max**"? Because the method has been simplified to the maximum, for maximum effects (including 3 bonuses and 1 new effect), and maximum impact in the presentation.

It is now literally twice easier, compared the old Pi version I created in 2010.

Also, **Pi Max** now allows you to reveal birthdays in month/day format and day/month, without extra effort.

You will receive the necessary pocket-sized book. Format 10.8 x 17.5 cm (4.25 x 6.88 inches), 90 pages.

Provided with a detailed 12-page instruction PDF in English, as well as video instructions in English (online streaming), and a link to a free online training app.

About the training app:

For the **Pi Max** demo to be both impressive and entertaining, of course you're going to have to practice. The duration of this training depends on your mastery of the method and your diligence.

To help you train alone more easily, I have created an online application. You can use it on Mac, Windows or Android, whether you're on your smartphone, computer or tablet.

The online application asks you questions to practice the different phases of the routine, then it tells you if you made a mistake or not.

This training application is available for free online, the link is in the instructions you will receive.
