
Flower of Fire by Kings Wild Project - Pokerdeck

Inspired by vintage Japanese fireworks catalogs, **Flower of Fire Playing Cards** is a stunning representation of the explosive beauty of traditional fireworks. The deck is the brainchild of Kings Wild Project's Jackson Robinson who designed the deck from the ground up during the 24-hour Enduro live stream last year.

From the moment you lay your eyes on this deck, you'll be captivated by its intricate details and vibrant colors.

The cards feature a black background, with intricate patterns of red, green, purple, yellow and blue representing the sparks and explosions of fireworks.

The courts and Aces are particularly eye-catching, featuring beautifully illustrated fireworks patterns that seem to come alive on the cards. Also, the pips of each suit have been updated with fireworks patterns... making the face cards incredibly eye-catching on the black background.

The explosive deck is not just a beautiful deck to look at; it is also functional. Whether you're a collector or a player, this deck is sure to bring a spark of excitement to your playing card collection. The cards are printed on high-quality card stock, making them durable and easy to handle.
