## **Looking for a House XL by Ickle Pickle -Trick**

A comedy sight gag. The picture of a huge mansion is shown and you explain this is the house your wife wants. When folded in half it becomes a nice ranch house that's more in your price range. Your wife asks where her mother will stay while visiting. You reply that you'll build her a nice guest house as you fold the paper once more to show an old fashioned wooden "out house"!

For the first time this effect is in COLOR! And now on NO TEAR paper to last you a long time!
