### **A Peek Inside**

You could steal five or six books from the *Magic Castle* library, and not get anywhere near as much help and inspiration as you'll get with WEED.

This book is designed to skyrocket your creativity - it offers practical techniques and exercises for *improvising without preparation* as a comedy magician - which is different than what a set-up punchline stand-up comic does, or sketch actors improvising with each other do. You get a *sure-fire callback system* with tags that you can incorporate into your show right away - if you have no idea what that last sentence meant - *you need this book*. I reveal my personal *innovative ideas on how to capture* swinging singles, kids, teenagers, seniors, corporate.
