### Other Reviews

*"Steve is one of the best in the world at developed creative magic and a sustainable career. We should study him - like scientists probing a rat. A very smart, very funny rat... Spill is at a point in life where he knows absolutely everything, and it's all in this book."*

"I have only had this book a week and I have already read it twice. It's full of real insight, practical routines (one of which I'm working on for my show right now) and it's just super fun to read .. "

- **BEN SEIDMAN**

"I've seen Steve perform his "Himber Free" linking finger ring routine and was fooled by it. Having just read this chapter, I can honestly state that this routine alone is easily worth the price of the entire book to a working pro. I'm guessing some of the other routines are also in that category and look forward to studying them as well, but am already satisfied with the value of my purchase. Thanks for sharing this Steve!"

- **JON ARMSTRONG**

"WOW! SO GOOD!" "

- **RICHARD HATCH**

"There are only a handful of books on magic that contain so many practical and truly commercial routines. A smart performer with a halfway decent personality could probably take just these twelve"
