
Spiders (Marked Cold Silver Foil) - Pokerdeck - Markiertes Kartenspiel

Luxury cold stamped foil deck that hides an ingenious clock marking system at an affordable price, let you be captured by the cobweb.

Printed by WJPCC with an innovative cold foil printing technique, that is an advanced method in which the metallic foil is applied to card stock and it offers the feature of being the underlying layer for printing so it doesn't have all the limits of the hot foil. This kind of cold foil is basically metallic silver and inside the metallic silver there is the holo foil, it's different from the 90% of the other holo decks that you've seen in the past, it's not overtly holographic because it's mixed with the Silver.

The design is inspired by the traditional Bicycle, with the double frame and the two equidistant circles in the center in which the spider logo is located.

FEATURES:

- Printed by WJPCC.
- Cold silver/holo foil on the back.
- One-time print run (that starts from 300 decks).
