
Comet Brown Leather Silver Shell by Andrew Dean

Comet is the world's most compact, minimalistic signed card to sealed envelope/peek wallet.

It's sleek, ergonomic design is perfect as an everyday carry but sophisticated enough for any professional working performer.

Inside the **Comet** you have 4 fantastic and different card reveals.

Reveal one is a full signed card from the back of the credit card holder

Reveal two is a playing card folded in half from a pocket inside and your spectator can remove the card.

Reveal three is one of my favorites, the half signed card rises from the credit card holder sandwiched between your bank cards. Your spectator can do this reveal.

Reveal four is the one that is going to blow your audiences away and become your reputation maker. The signed card is inside a custom made sealed envelope inside your **Comet** credit card holder.

AGAIN THE SPECTATOR CAN REMOVE THE ENVELOPE FROM THE COMET

And to top it all off... You also have a built in crystal clear peek.

NEVER BUY ENVELOPES EVER AGAIN

That's right I have included a printable PDF so you can print and create your own envelopes and slides.
