
ERDNASE - Pokerdeck

Produced exclusively for the official Erdnase movie these cards have been created for card mechanics and magicians alike. The back design and tuck box are inspired by the green cloth cover of TEATCT and show an ornamental pattern consisting of oak leaves, branches and acorns. Apart from a customized Ace of Spades and two identical Jokers, the cards also feature standard American faces with a modified color scheme.

Printed by Cartamundi on slimLine stock with a True Linen B9 finish they are perfect for professional card handlers. Packaged inside a letterpress-printed tuck box featuring metallic-inked accents these cards appear just as prestigious as Erdnase's book.
