
BIGBLINDMEDIA Presents Alpha2Omega by Stephen Tucker

READY FOR AN EXAMINABLE B'WAVE? COMES WITH EIGHT USPCC CARDS & DOWNLOAD INSTRUCTIONS

Stephen Tucker's 'Omega' has long been hailed as one of the greatest packet tricks ever created. Simple to do, fully examinable and devastatingly impressive, it will knock your spectators for six!

"Superb. The most baffling and incredible packet trick I've seen in years!"
- **Jerry Sadowitz**

So what is **Alpha2Omega**?

You have two sets of four of a kind (let's say, two sets of Aces). One set is tabled. One set is placed behind your back. You have ANY Ace named. Seconds later, this ace is face down, in the set behind your back, and... it has a different colored back to the other three! You now rub their freely named Ace on your sleeve and its face completely vanishes!

THESE FOUR CARDS ARE NOW EXAMINABLE!

BUT THAT'S NOT ALL. Now, you spread the tabled set of face down Aces (that have been in full view throughout) and their named Ace is face up!

BUT THAT'S NOT ALL. now someone removes the face up Ace and it has a different colored back to the other three!

BUT THAT'S NOT ALL. the shell-shocked spectator flips over the three remaining face down Aces only to discover that they are all BLANK! THEIR NAMED CARD WAS THE ONLY ONE THEY COULD HAVE CHOSEN!

Now for the amazing bit - they can name ANY Ace! (It can be different every time you perform).

There are no false counts - The handling looks the same every time!

There are no specially printed cards! (No need to 'ever' buy an expensive

replacement set!)

100% self-working? Not quite, but Omega is incredibly easy to perform!

Stephen Tucker teaches you all the inside workings of this fabulous routine!

PLUS get an exclusive **BONUS** routine from the brilliant mind of Liam Montier -
