
Queens Through The Table by Dominique Duvivier

A new approach to cards through the table!

The effect is totally amazing, the Queens travel in a very clear way and pass one by one through the table!

We offer two versions of this trick.

The first one requires absolutely no sleight of hand and relies on the devilish ingenuity of using special cards. This is ideal for those new to card magic.

The second one will be of particular interest to advanced magicians, who can enrich this trick with additional effects!

This is one of the most impressive small packet tricks, which you should definitely include in your repertoire!

The cards are supplied in Bicycle quality.
