
REVERSE MATRIX RED by Chiam Yu Sheng

The classic "traveling hole" plot on steroids.

Effect:

A card is selected and may be signed. Next, a hole is punched in each corner of the card. Magically and visually you slide 2 holes -through the middle- all the way to the other end, so all 4 holes are now sitting in a row - with just a slight shake the holes visually travel -through the middle - back to their corners again! LOTS of different sequence possibilities with this fantastic gimmick.

Words won't do this effect justice - "**Reverse Matrix**" looks like trick photography and is yet VERY easy to do. You will fool yourself.

Comes complete with ready to go "**Reverse Matrix**" gimmick and online video instructions. Use your own hole puncher.
