
Butterfly Worker Marked (Red) by Ondrej Psenicka - Pokerdeck - Markiertes Kartenspiel

In Autumn 2022, we ran a successful Kickstarter campaign for a new series of **Butterfly Playing Cards, the Workers Edition**. The classic Butterfly design is now surrounded by a white border.

Thanks to their versatility, bordered playing cards are still the main choice among magicians. They work great in sandwich and triumph effects and help conceal multiple card turnovers.

The foundation of the **Butterfly Workers** line-up are the **Red and Blue** decks. We printed these with Cartamundi on their slimline stock with true linen B9 finish for consistency with the rest of Butterfly Playing Cards.

The faces feature a classic USPC design with an adjusted color scheme and are one-way. All four Aces carry big center floral pips.

Every deck comes with an instructional card and a link to a 30-minute tutorial. It explains the marking system and offers ideas for tricks with marked cards. Every deck also includes a double-backer.

There were 3.000 decks printed of both Red and Blue **Butterfly Workers**.

(for us - If you're used to performing with or want to add gimmicked cards to your repertoire, a Gaff Deck for the Red and Blue Butterfly Workers is available here.)
