
Big Money by Anthony Miller and Ryan Bliss

Big Money is the jumbo coin set magicians have needed!

For a long time, magicians have used poorly made jumbo coins that did one thing - "OH LOOK! A BIG COIN!" RFA Productions and Ryan Bliss have worked together to create a custom made five piece copper and silver set that includes interchangeable shells and a matching copper/silver coin. At 2.5 inches in width, the coins allow lovely work for both platform and close up performances. To prevent wear, the plating on the coins is very heavy and the shells are engineered to last for years without bending! The instruction videos include routines and ideas to help you integrate the set into your performances.

The set is being produced in limited quantities, so if you have been looking for a set of jumbo coins that are great looking and versatile - this is the set for you.

Remember - these are a set of tools, not toys! Enjoy!
