
MULTIPLE MONTE CLOSE UP by Juan Pablo

Multiple Monte is a super visual and excellent "three card monte" routine composed of three phases and with an unexpected and very funny ending.

Multiple Monte includes the possibility of giving this routine three different endings so that you can choose which ending to use in your presentations.

It also includes an "extra special card" that will allow you to customize the trick according to your creativity.

Multiple Monte is inspired by Jim Temple's excellent "Monte Color" routine, but this time the design and handling of the cards is different, allowing all three cards to be seen clearly at all times and also minimizing the technique involved. is required to perform this trick, which makes the development of the trick look very natural in all phases and the ending is unexpected and inexplicable to the public.

This routine is special for magicians who do "parlor magic" or "close up" where you can tell a little and funny story about how money is lost in this type of bets.

Multiple Monte is available in Jumbo size and also in Close Up size (in the "close up" version you can carry the cards in your jacket or pants pocket). **Multiple Monte** is super easy to do and resets instantly.
