## DUALITY PRO by Cobra Magic

Would you believe that you can embed a free-thought number (or name, country, etc.) into a pre-recorded video, while it is playing?

YES, with **Cobra Magic's Duality PRO** on your mobile phone you can do exactly that!

You show your spectators a video of yourself (or an assistant or an animated character) on your mobile screen, and ask a volunteer to think of any number (or a word, name of a country, etc.). Towards the end of your own video, the item thought of suddenly appears - embedded in the video. BOOOOOM!!!

After the effect is over, you can share the video clip (not just a link, but the actual video) with the "prediction" over your favorite social media platforms, together with your contact details as well as FB page, Instagram or website. Let the video spread your name.

- The one-time set-up (per video) takes only a few minutes
- It's always in your pocket, ready to perform
- The video is totally customizable. Apply your creativity and embellish it with your own style
- 11 different input methods, to suit your preference
- Both Portrait (for mobile) and Landscape (for large screens) are enabled
- Easy to set up (only 3 taps) - even easier to perform

**Play it BIG** You can project the video on a large screen, to generate a great stage attraction (using a special mode that projects onto the screen).

**Generic Videos** The app includes a few ready to perform videos prepared by leading magicians. Just learn the input method (1 minute) and you are ready to perform.

*"It's a marvel, We have a magic trick on us which is the DREAM of magicians"*  
- **Mercurio thierry - Le Petit Magicien Review**

*"Always in your pocket and you're ready to go anytime, anywhere, use your personal videos, Totally easy to set-up"*  
- **Magic Orthodoxy review**
