
LUCKY STAR by Hanson Chien

A rubber band turns into a star.

From a sleight of hands into a real magic and finally ends in spectator's hand

"Lucky Star is one of my favorite rubber band routines, it shows the different faces of magic."

- Hanson Chien

BASIC EFFECT

First you show a normal rubber band, then you instantly create a star shape rubber band with one hand.

In the end, that rubber band magically turns into a real star-shaped rubber band in spectator's hand.

BRIEF HISTORY

This idea came up 10 years ago. At that time, it's just a rubber band flourish, which can make you instantly create a star shape rubber band.

Until 2015, Hanson turned this flourish into magic and first released in Taiwan.
