# **PCTC Productions presents Kicker Changing Deck by Jordan Victoria**

**Kicker Changing Deck** is the color changing deck for your daily use!

Imagine a freely selected card placed in between a pair of cards. The 3 cards are shown front and back and the middle card changes color (from blue to red).

Now take off the selected card from in between the pair of cards and show its back once again: it has another color!

Place this card on top of the deck, spread it and all the cards changes color.

- Very easy to do
- Comes ready to be use out of the box
- Can be used with any deck - any color (use your favorite deck)
- Powerful for your audience
- You can show the front and back of your pair at any time
- The card is freely selected and can be signed (no force)
- No flap, no thread, no magnets, no... almost nothing!
- All the moves are logical and allows you to justified everything

**Note:** You will receive a random pair of cards (can be Jokers, red Queens, black sevens or any other pair from a deck)

## **Jordan's tips:**

I recommend you to use this trick as an opener. The trick is very easy to do and very easy to introduce. You'll definitely blow your spectator's mind with this double card change and kill them with the final changing deck!

I perform this for over 10 years and it's still one of my favorite effect to perform when someone asks me for a trick.
