
TOCAAN Deluxe Edition by David Jonathan

TOCAAN is the culmination of more than five years of work to create an astoundingly clean ACAAN with a shocking kicker twist! Included in this Deluxe Edition is everything you need to start performing this super practical routine right out of the box. On the one hour tutorial, you will learn multiple methods to achieve this stunning effect, including the following standout routines:

Virtual Version:

A deck is placed in FULL VIEW, isolated on the table - the camera NEVER moves or switches the entire time! The participant freely chooses ANY card from their own deck and names ANY position from 1-52. You pick up the deck and cleanly count facedown to the number named. Not only is the participant's freely chosen card found BANG ON at that position, but EVERY other card in the deck is revealed to be BLANK!

Live Version:

You hand the participant a deck of cards to hold on to and have them mentally create a playing card. They are now asked to intuit which position that card lies in the pack they have been holding the entire time (they can really say any number from 1-52!). The participant deals facedown to that position and incredibly it is their THOUGHT OF CARD! For the stunning finale, the rest of the cards are turned over and EVERY single card is BLANK and can be examined!
