
Hanson Chien Presents SBD (Sponge Ball Dropper) by Ochiu Studio (Black Holder Series)

Welcome to the second project of **Black Holder Series** from Ochiu Studio!

SBD is the world's first sponge ball holder.

SBD can hold up to twenty 1-inch sponge balls, or one 4-inch sponge ball, the dropper can be clipped on a belt.

SBD's rotatable head design allows users to clip the unit anywhere on the belt. More user friendly for both right-handed and left-handed performers.

SBD's axis design on the securing clip allows a certain degree of movement, so the device will lay flat against your body at all times.

Without fumbling in your pockets for props, just a light squeeze on the SBD trigger, you can get sponge balls right at your fingertips.

If you don't know any sponge ball routine, don't worry. We will teach you one simple sponge ball routine as well as how to use the device.

With **SBD**, your sponge ball magic will go to another level.

This is the next-generation holder you've ever experienced.

WHAT YOU RECEIVE

- A Sponge Ball Dropper
- A quick start guide
- Online instruction video

NOTE: Sponge balls NOT included.
