
LEGACY SYSTEM SMALL WALLET by Joao Miranda

The Legacy Small Wallet kit consists of a very special holder where the legacy mechanism fits inside. The holder also accommodates a very small and specially made business card leather wallet, in an open position.

So the performer can reach into his jacket and remove the wallet instantly.

It also has a special clip meaning you can attach it in to your belt or inside your jacket pocket.

We also explain a very easy move that gives the perfect illusion that you are removing the wallet from your pants pocket.

Comes with 25 blank cards for your predictions with the perfect size to be used with the wallet.

DISCLAIMER: The legacy small wallet kit does NOT include the legacy system.

Small story: This methodology of a smaller wallet was born thanks to Calen Morelli.

When Calen came to Portugal to film the Metal Phone project he mentioned to *João that some people would prefer a small business card wallet.*

João was inspired by Calen and this accessory was born.
