## LEGACY SYSTEM REMOTE by Joao Miranda

The Legacy remote control works with the legacy system and has **4 DIFFERENT MODES**:

**NUMBERS MODE:** the performer can input numbers and even add blank spaces between them (perfect for a lottery routine).

**HOURS MODE:** The remote adds two points between the numbers you input. So if the performer inputs 1025 the writing will appear as 10:25

**CARDS MODE:** You can input any card, and it will have the suit drawn.

**DATES MODE:** the remote automatically adds slashes to the numbers you input, in the format xx/xx/xxxx.

So the slashes will be *AUTOMATICALLY* added between the numbers you input in a row. So if the performer inputs for example 10072022 (July 10th 2022), the writing will appear as 10/7/2022 (*This was an idea of David Penn and was added recently and that is why it is not mentioned in the original trailer*).

**TEXT MODE:** You can write any word with the remote, including adding spaces!

You can feel the remote buttons from the pocket, so you can adjust the **power of the vibration** of the remote in the app.

With the remote the performer can predict up to **4 lines with it**.

The remote will always **vibrate back** when a prediction is written, so the performer knows he can reveal it.

The remote works independently with the system, so you **do not need** to use your mobile phone.
